

Become your Customers' Best Partner!

distribute

stitch era Universal

Powerful Software for embroidery,
absolutely FREE for the end user.

Complete and Integrated

it covers the activities of design management, lettering, edition, creation of new embroidery designs and embroidery simulation.

Modern and Advanced

it has been developed using the latest generation technology and offers a superior user interface.

Free for the User

user does not have to pay for the user license, and will be able to install it in as many computers as desired.

Why become an Authorized Dealer?

- Because the dealer must offer a superior product to customers, satisfying expectations.
- Because the customer is looking for the best conditions, and the dealer needs to remain competitive.
- Because Stitch Era Universal delivers the dealer's unique image, and connects the user with his/her dealer.
- Because the cost of the license being distributed is much cheaper than that of any other software.
- Because Customer Service and Technical Support requirements are less demanding, decreasing your costs.
- Because the dealer can hand out a finished digitizing product as a sample to those who are not customers yet – does your supplier offer that now?
- Because the user can use it in several computers, either in the office, at home or while traveling.
- Because we have started a new ERA in the Embroidery Industry, with UNIVERSAL impact; and now it's your chance to become a key member of the Stitch Era Universal community.

Sienna

Stitch Era Universal

Stitch Era Universal can only be handed out by Sierra Technology Group Dealers authorized by means of a distribution arrangement.

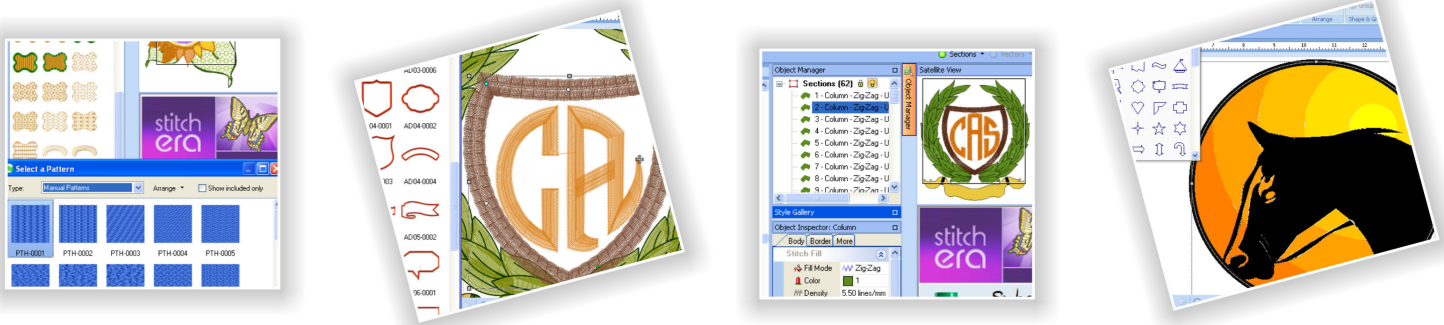

Stitch Era Universal works as long as it is connected to the Internet. The application includes advertisements. This is the way chosen to be able to continue its development and keep the product always up to date.

When running Stitch Era Universal, the first shown window includes the Information of the Authorized Dealer that has handed out the software copy.

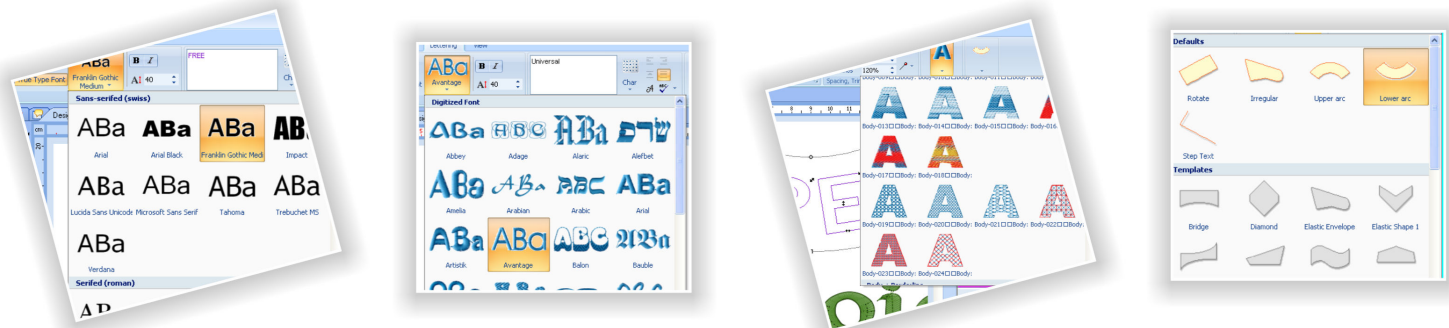

The software is compatible with the most embroidery machines, either industrial or domestic. The professional user looking for autonomy and more features will be able to choose one of the optional available solutions.
